

# NWLA Fitting and Showing Clinic May 17,18 2008

## Clinic Preparation

Your animal must be halter broke.

It's a good idea to start handling the cattle as soon as possible getting them used to being washed and blown dry.

Please wash your animals the day before the clinic and rinse well. Comb and dry the hair forward. Keep them in a clean area so they are as clean as possible for the clinic. It's a good idea to not feed them any grain the day before the clinic and only grass hay. That way they'll stay cleaner on their rear end and hind legs after you've washed them.
